1. SITE IDENTIFICATION

1.1 Type	1.2 Site code Back to top
B	LU0001054

1.3 Site name

Fingig - Reifelswenkel

1.4 First Compilation date	1.5 Update date
1997-08	2012-09

1.6 Respondent:

Name/Organisation:	Gilles Biver / Ministère du Développement durable et des Infrastructures Département de l'environnement
Address:	4, Place de l'Europe L-1499 Luxembourg
Email:	gilles.biver@mev.etat.lu

1.7 Site indication and designation / classification dates

Date site classified as SPA:	0000-00
National legal reference of SPA designation	No data
Date site proposed as SCI:	1998-12
Date site confirmed as SCI:	2004-12
Date site designated as SAC:	2009-11

Règlement grand-ducal du 6 novembre 2009 portant désignation des zones spéciales de conservation. (Mém. A - 220 du 17 novembre 2009, p. 3834)

91E0			1.0		G	C	C	B	B
B									

- **PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- **NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- **Cover:** decimal values can be entered
- **Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

Species					Population in the site						Site assessment			
G	Code	Scientific Name	S	NP	T	Size		Unit	Cat.	D.qual.	A B C D		A B C	
						Min	Max				Pop.	Con.	Iso.	Glo.
B	A073	Milvus migrans			c				C	M	D			
B	A074	Milvus milvus			c				C	M	D			
M	1323	Myotis bechsteinii			r	20	70	i	P	M	C	B	C	B
M	1324	Myotis myotis			c	1	10	males	R	M	C	B	C	B
B	A234	Picus canus			p		1	p		M	B	B	C	B

- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Species					Population in the site				Motivation					
Group	CODE	Scientific Name	S	NP	Size		Unit	Cat.	Species Annex		Other categories			
					Min	Max		C R V P	IV	V	A	B	C	D
P		Dactylorhiza majalis						P			X			
M	1312	Nyctalus noctula						P	X		X			

P		Scorzonera humilis						P			X			
---	--	------------------------------------	--	--	--	--	--	---	--	--	---	--	--	--

- **Group:** A = Amphibians, B = Birds, F = Fish, Fu = Fungi, I = Invertebrates, L = Lichens, M = Mammals, P = Plants, R = Reptiles
- **CODE:** for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))
- **Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present
- **Motivation categories:** **IV, V:** Annex Species (Habitats Directive), **A:** National Red List data; **B:** Endemics; **C:** International Conventions; **D:** other reasons

4. SITE DESCRIPTION

[Back to top](#)

4.1 General site character

Habitat class	% Cover
N20	1.6
N08	0.67
N14	30.46
N19	0.01
N17	4.17
N16	43.89
N10	1.09
N23	0.52
N15	0.02
N26	17.57
Total Habitat Cover	100.00000000000001

Other Site Characteristics

1.1 Situation Le site couvre une partie du vallon peu encaissé de ruisseau 'Welieschbaach' près de Fingig.
 1.2 Milieu physique Excepté les fond alluviaux du ruisseau, la totalité du site est formé par les couches de marnes à Septaries du Lias moyen. La majeure partie de la zone est couverte par des sols argileux, faiblement à modérément gleyifiés, excepté l'extrémité sud occupé par des Sols argileux, non gleyifiés sur substrat de macigno et la vallée de la "Welieschbaach" formée d'alluvions.
 1.3 Occupation du sol Les forêts occupent la majeure partie du site (69%). Il faut surtout mentionner les restes de forêts alluviales (1% de la zone). Les territoires agricoles, essentiellement des prairies, couvrent 31 % de la zone.

4.2 Quality and importance

Intérêts selon la directive "Habitats" La zone abrite cinq types d'habitats de l'annexe I. Les versants du vallon sont couverts par des forêts feuillues et notamment par la hêtraie du Asperulo-Fagetum et la chênaie du Stellario-Carpinetum. Dans une enclave de la chênaie se trouve un reste de prairie à molinie de haute valeur biologique. A mentionner également un beau reste de forêt alluviale le long de la forêt du 'Reifeswenkel'. Le principal intérêt du site consiste cependant dans la présence de la prairie à molinie, biotope devenu très rare au pays. Les forêts de la zone constituent un site de reproduction pour *Myotis beschsteini* et un territoire de chasse pour *Myotis myotis*.

4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

Negative Impacts			
Rank	Threats and pressures [code]	Pollution (optional) [code]	inside/outside [i o b]
M	K02		i
M	B02		i
L	A08		i
M	K02.03		i
M	B01.02		i
M	B02.04		i

Rank: H = high, M = medium, L = low

Pollution: N = Nitrogen input, P = Phosphor/Phosphate input, A = Acid input/acidification,

T = toxic inorganic chemicals, O = toxic organic chemicals, X = Mixed pollutions

i = inside, o = outside, b = both

Positive Impacts			
Rank	Activities, management [code]	Pollution (optional) [code]	inside/outside [i o b]
M	A04.02		i
M	B02		i
M	A03.02		i

4.4 Ownership (optional)

4.5 Documentation

5. SITE PROTECTION STATUS (optional)

[Back to top](#)

5.1 Designation types at national and regional level:

Code	Cover [%]	Code	Cover [%]	Code	Cover [%]
LU07	100.0				

5.2 Relation of the described site with other sites:

designated at national or regional level:

Type code	Site name	Type	Cover [%]
LU06	Grass - Moukebrill	/	
LU07	Région du Lias moyen	-	100.0

5.3 Site designation (optional)

Règlement grand-ducal du 6 novembre 2009 portant désignation des zones spéciales de conservation.

6. SITE MANAGEMENT

[Back to top](#)

6.1 Body(ies) responsible for the site management:

6.2 Management Plan(s):

An actual management plan does exist:

<input checked="" type="checkbox"/>	Yes	Name: Plans de Gestion, site Natura 2000 « Fingig - Reifelswenkel » Zone Spéciale de Conservatio LU0001054 Link: http://www.environnement.public.lu/conserv_nature/dossiers/Natura_2000/Liste_nationale_des_Zones_Habitats/inde
-------------------------------------	-----	---

☐ No, but in preparation

☐ No

6.3 Conservation measures (optional)

Principes de gestion L'intérêt principal du site est la présence d'un reste de prairie à molinie. Cette parcelle fait actuellement déjà l'objet d'un contrat d'extensification dans le cadre du projet pilote 'Nature 2000' du Ministère de l'Environnement. Les hêtraies du site devraient être gérées selon les principes d'une sylviculture proche de la nature. Pour la forêt alluviale, les considérations en vue de l'optimisation des fonctions écologiques doivent primer sur les considérations économiques.

7. MAP OF THE SITES
