

# HAFF RÉIMECH – A SPECIAL NATURE RESERVE

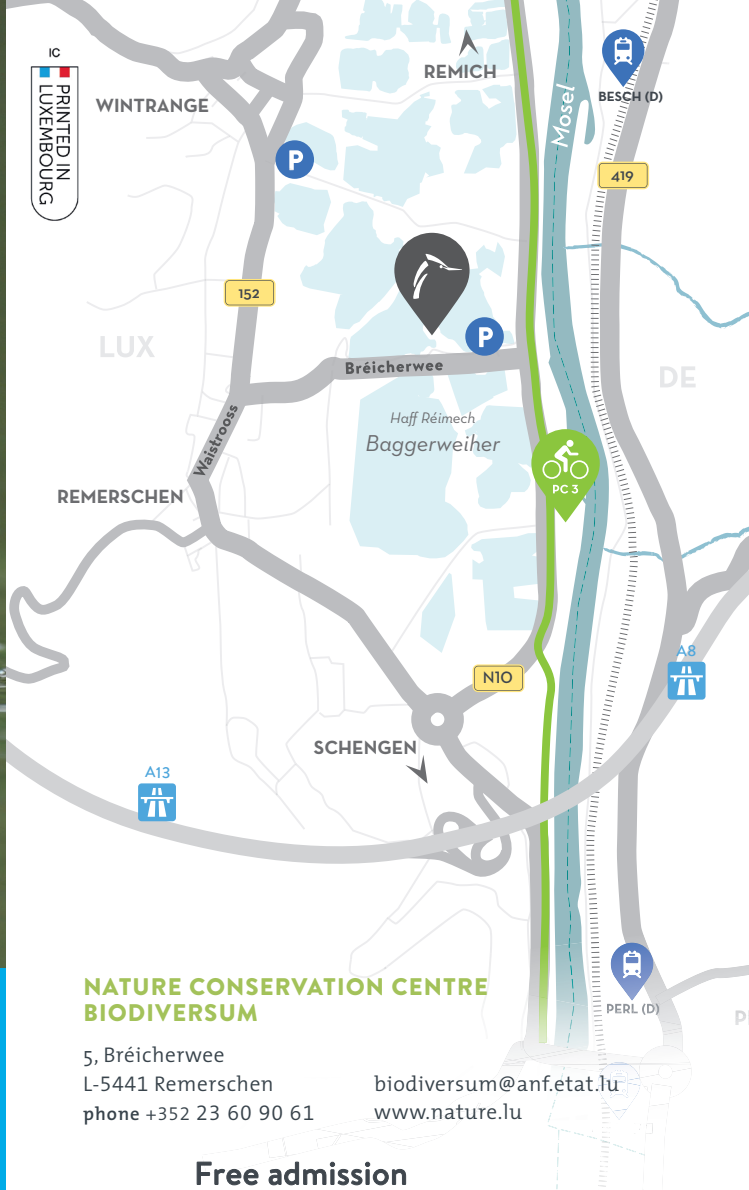

photo © Raymond Gladen

“Resting area and habitat  
for many bird species”

- Most species-rich wetland of Luxembourg: on just about 0,1% of the country's total area up to 76% of the bird species reported in Luxembourg have been detected here
- National and international bird reserve (Ramsar site and Natura 2000 habitat)
- Resting area for many protected migratory bird species during their journey
- Nature discovery trail and several observation huts

“Unique architecture  
in a nature paradise”

- Interesting architecture: wooden construction in the shape of a reversed boat hull
- Interactive exhibition on two floors
- Temporary exhibitions with focus on sustainability
- Education centre for school classes
- Shop with books and a range of materials covering the subject of nature conservation
- Guided group tours on demand
